VALUE-ADDED SERVICES TO NON-PROPERTY OWNERS

The Group provides comprehensive value-added services to non-property owners, primarily property developers, throughout the different phases of the property development and sales process, primarily including property engineering services, on-site services and other services. For the six months ended June 30, 2022, the revenue from value-added services to non-property owners decreased by approximately 48.1% from approximately RMB607.5 million for the corresponding period in 2021 to approximately RMB315.5 million.

The Group improved its independent operation capabilities by optimizing business structure of property engineering services, adjusting business models and establishing professional engineering management teams; relieved geographical restrictions, coordinated and deployed engineering resources, implemented a headquarters-branch linkage model, and standardized the engineering business management of property companies through the integration of personnel in various regions, and achieved higher performance growth in 2021. However, as the non-owner value-added service customers are mainly property developers, the sharp decrease in the construction area and completed area of property developers in 2022, the property engineering services in the value-added services to non-property owners decreased significantly by approximately 50%, and the revenue was significantly lower than the corresponding period in last year.

The Group has built a 24/7 remote monitoring and alarm platform for facilities and equipment that integrates software and hardware by combining the Internet of Things and cloud computing technologies. The Group has connected the platform with internal business systems, thereby realizing the automation of inspection and alarm processing of facilities and equipment, enhancing the protection of facilities and equipment and optimizing management efficiency. Also, through intelligent operation and standardized process, the Group is capable to provide customers with standardized and quality services while improving operational efficiency. The Group provides smart community designing services to property developers who expect to use our property management expertise to refine their property project designs, including but not limited to the design of smart access control systems, security patrolling systems, public facilities monitoring systems and car park management systems, so as to achieve staff reduction and efficiency enhancement. At the same time, a series of business instruction manuals such as the operation manual of the film-like service system have been formulated to clarify service standards and enhance the value of property services.

COMMUNITY VALUE-ADDED SERVICES

In order to improve the community living experience of owners and residents in the properties under the Group's management and create more value for its services, the Group provides comprehensive community value-added services to property owners and residents, primarily including property space management services and home-living services. The revenue from community value-added services for the six months ended June 30, 2022 was approximately RMB149.2 million, representing a decrease of approximately 10.3% from approximately RMB166.3 million for the corresponding period in 2021.

Property space management services

The Group provides property space management services to property owners and residents, and provides turnkey furnishing services that can improve property value, convenient property brokerage services and parking agent sales services by leveraging the active engagement and close relationships with the residents that it has nurtured through its property management operations. The revenue from property space management services for the six months ended June 30, 2022 decreased by approximately 44.3% from approximately RMB96.8 million for the corresponding period in 2021 to approximately RMB53.9 million.

For turnkey furnishing services, the Group has been linking up with property developers in advance, successfully held events such as meetings with property owners to build communication bridges for property owners and merchants, and provided merchants with more product demonstration opportunities by recruiting candidates for display flats, to enable property owners to experience the life scenes in future and release their needs, thereby providing property owners with one-stop shopping experience and professional decoration consultation services to achieve a win-win situation.

For property brokerage business, the Group deploys a Sales and Lease Operation System (租售業務系統) which consists of a “property dictionary” system and a “resident-property matching” system. These systems securely manage customer information and efficiently match supplies and demands of the properties, provide millions of property owners with convenient rental and sales channels. However, due to the decline in the volume and price of real estate, the second-hand property business has been subject to severe wait-and-see sentiment, resulting in a relatively large drop in revenue; secondly, due to the limited availability of parking spaces from our partners, the revenue from the high-margin parking space intermediary service has been drastically reduced. The Group has formulated solutions to expand the size of revenue from such high-margin business by leveraging the Group’s customer stickiness and geographical advantages.

Home-living services

The Group offers home-living services to property owners and residents with their daily needs as the core. The primary home-living services provided by the Group include: community retail and commercial procurement services and home repairs, maintenance and housekeeping services. The revenue from home-living services for the six months ended June 30, 2022 increased by approximately 37.2% from approximately RMB69.4 million for the corresponding period in 2021 to approximately RMB95.3 million.

For community retail and commercial procurement services, the Group launched a comprehensive retail model integrating its online shopping, offline convenience stores and home delivery services. Its online shopping mall focuses on high-end consumer goods and its offline convenience stores focus on groceries. The targeted retail model lowers its operating costs and ensures product quality. Its headquarters directly manage the offline convenience stores. With such a streamlined management structure, the Group is able to respond to requests and resolve issues in a timely manner. We believe its comprehensive retail model, coupled with its home delivery services where it helps customers shop and deliver groceries to the customer’s door, provide convenient shopping experience to the customers. As of June 30, 2022, the Group had a total of 54 offline convenience stores which were located in the communities under its management, with over 40,000 stock keeping units or SKUs and approximately 1 million registered users on Rice Mall (米飯公社).

For the six months ended June 30, 2022, the Group accomplished revenue of approximately RMB1,063.5 million, representing a decrease of approximately 17.6% as compared to that of 2021; gross profit of approximately RMB320.1 million, representing a period-on-period decrease of approximately 28.8%. Net profit for first half of the 2022 amounted to RMB181.0 million, representing a decrease of approximately 26.7% as compared to that of 2021. Profit attributable to the owners of the Company amounted to approximately RMB180.9 million, representing a decrease of approximately 26.8% as compared to that of 2021. Basic earnings per share amounted to approximately RMB0.48. This is mainly due to the impact of the overall weakened real estate market, which resulted in a significant decline in gross profit for non-property owner value-added services. In order to co-combat the Covid-19 pandemic, the properties provided more guaranteed living and conveniently priced items, and the gross margin of community value-added services decreased.

OUTLOOK

Looking forward to the second half of 2022, the Group will continue to uphold (i) the principle of customer-oriented services, adhere property service quality, upgrade the property service brand, and enhance the trust of owners and word-of-mouth effect through quality services to secure a solid market position; (ii) improve the non-owner value-added system; intervene from the planning and design of projects, and undertake the role of a pre-intermediary from the perspectives of post-period customers and property services to facilitate the upgrade of the property brand; (iii) continuously improve the “whole life cycle and whole service chain” service system to continuously enrich the segment of community value-added services, further promote businesses such as car washing and beauty, kiosks, promote the property brokerage and other property space management services, and continue to promote the community health industry to provide owners with a “convenient and reassuring” community health experience to enable owners to feel our “caring” property services; (iv) at the same time, we will strengthen the construction of financial management and control and capital support system to improve the financial management and control efficiency as well as the risk resistance capability of the enterprise; and (v) cultivate and introduce professional talent, optimize the talent structure, promote the information technology construction of the Company, achieve technology empowerment, thereby improving the efficiency and quality of the Company’s decision-making process.

The gross profit margin of the Group decreased from approximately 34.9% for the six months ended June 30, 2021 to approximately 30.1% for the six months ended June 30, 2022, which was mainly attributable to the decrease in the proportion and gross profit margin of value-added services to non-property owners and community value-added services, which were higher margin businesses.

The Group's expenses decreased by approximately 63.8% from approximately RMB8.4 million for the six months ended June 30, 2021 to approximately RMB3.0 million for the six months ended June 30, 2022, primarily due to the decline of the Group's business, which resulted in the decrease in revenue, and thus the employee benefit expenses and the travelling and entertainment expenses.

Financial risks

The Group's activities are exposed to a variety of financial risks: foreign exchange risk, credit risk and liquidity risk. Foreign exchange risk

The Group's businesses are principally conducted in RMB. As at June 30, 2022, major non-RMB assets were cash and cash equivalents and financial assets at fair value through profit or loss amounted to RMB32.9 million which were denominated in US\$. Fluctuation of the exchange rates of RMB against US\$ could affect the Group's results of operations.

Currently, the Group does not implement any foreign currency hedging policy, but the management of the Group will closely monitor the exposure to any exchange rates and consider the use of hedging instruments if necessary.

Credit risk

The Group is exposed to credit risk in relation to its trade and other receivables, contract assets, cash deposits at banks and financial assets at fair value through profit or loss. The carrying amounts of trade and other receivables, cash and cash equivalents and financial assets at fair value through profit or loss represent the Group's maximum exposure to credit risk in relation to financial assets.

The Group expects that there is no significant credit risk associated with cash deposits at banks as they are substantially deposited at banks of high credit ratings. Management does not expect that there will be any significant losses from non-performance by these counterparties.

The Group expects that there is no significant credit risk associated with financial assets at fair value through profit or loss as the Group furnishes investment mandates to commercial banks, and these mandates require them to invest in wealth management products with high market credit rating, liquidity and stable return. Management expects that there will be no significant losses from non-performance by these counterparties.

The Group assessed that the expected credit loss (ECL) rate for trade and note receivables and contract assets from related parties were low considering the good financial position and credit history of the related parties. The Directors believe that there is no material credit risk inherent in trade and note receivables and contract assets from related parties. Apart from trade receivables and contract assets due from related parties, the Group has a large number of customers and there was no concentration of credit risk.

The Group expects the credit risk associated with other receivables due from related parties (including the loans due from related parties) to be low, since these entities have a strong capacity to meet their contractual cash flow obligations in the near term. The Group has assessed that the ECL rate for the amounts due from these entities are immaterial under the 12 months ECL method and considered them to have low credit risk, and thus the loss allowance is immaterial.

For other receivables due from third parties, the management makes periodic collective assessments as well as individual assessment on the recoverability of other receivables based on historical settlement records and past experience. The Directors believe that there is no material credit risk inherent in the Group's outstanding balance of other receivables.
